Procurement	international competitive two stage bidding procedure with prequalification for admeasurement works contracts
Project Description	The Government of the Hashemite Kingdom of Jordan has arranged finance from the Government of the Federal Republic of Germany through the German Development Bank KfW.
Requested Services	JVA is seeking to engage a qualified contractor(s) for the Rehabilitation of Irrigation Systems in Jordan Valley. The location of the project is in the Jordan Valley (north of the Dead Sea) and the Southern Part of the Dead Sea Region (southeast shores of the evaporation ponds - formerly the southern part of the Dead Sea-), as shown in figure 1-1 below.

Notice for Submitting Prequalification Documents

The project area extends from the north to the middle western parts of the Kingdom of Jordan. The project area can be divided geographically into four sections: North Jordan Valley, Middle Jordan Valley, South Jordan Valley, and Southern Dead Sea Region as depicted in Figure 2-1 below.

Notice for Submitting Prequalification Documents

The irrigation networks are segregated in Ghors based on the Directorate Organization of JVA for managing the irrigation in these regions. Each one of these regions is made up by different Development Areas (DAs). Each DA contains numerous farm units.

The aim of the project is to rehabilitate the existing irrigation networks includes priority DAs in the Southern Ghor, parts of the North Ghor, and parts of the Middle Ghor to raise the efficiency of the project, improve the irrigation delivery services (flow and head) to the farm units, reduce water losses (physical and administrative), and proper use for water to Improve the performance of irrigation network and increasing efficiency of water distribution in the project area as follows:

- **Lot (1): Rehabilitation of Irrigation Networks for South Ghor (DAs 40,41, and 42) and parts of North Ghor (T.O.18: covered DA34, DA7(Partly), DA8(Partly)):**

Rehabilitation of the existing irrigation networks except pumping stations for development areas 40,41,42 in Southern Ghor and for the development areas within Turnout 18 in the North Ghor (which covered development area 34, and parts of development areas 7 and 8 in, with a total length of 140 km of DI and HDPE pipes of sizes ranging between 90-800 mm including all valves, fittings, and accessories.

- **Lot (2): Rehabilitation of Irrigation Networks for parts of Middle Ghor**

Rehabilitation of the existing irrigation networks except pumping stations for development areas 22 only with a total length of 50 km of DI and HDPE pipes of sizes ranging between 90-1000 mm including all valves, fittings, and accessories

- **Lot (3): Construction of New Storage Reservoir in Northern Ghor**

Storage Concrete reservoir near (PS 41) with a total capacity of (30,000) m³, with all valves, fittings, accessories, mechanical and electrical works, roads and lighting works, including 700mm DI inlet and outlet pipes each about 300m long. The reservoir will be filled by gravity from ZC3 and feed the farm units irrigated by TO 33, TO 36 and TO 41 during day also by gravity.

Project Duration	Lot 1: 24 months Lot 2: 18 months Lot 3: 12 months
